

Asthma
Australia

National Research Program

All Asthma Australia Grants will be assessed against the criteria and weighting below.

CRITERIA	Weighting
1. Relevance to consumer care or service delivery	
Demonstrate: <ul style="list-style-type: none">— Significance of the need being addressed— How the proposal will result in improved consumer outcomes or service delivery— How, and how quickly, the research could have an impact— Relevance to the following areas of asthma care: prevention, epidemiology, diagnosis, treatment, supportive care, service evaluation, needs analyses and policy development. If there is more than one area of research, the links need to be identified.	20
2. Collaboration	
Demonstrate (where appropriate): <ul style="list-style-type: none">— Cross-disciplinary approaches with researchers, clinicians, consumers, clinician-managers, health care policy makers, industry and/or— Multiple site collaboration. If the research proposal is not collaborative, demonstrate how the adoption of the research findings is expected to occur. Demonstrate how the results of the research proposal could be communicated with Asthma Australia to other researchers, clinicians, students, consumers and health care decision makers.	15
3. Impact	
Demonstrate how the research proposal will build improved asthma outcomes in Australia.	15
4. Merit	
Address: feasibility, rationale, methodology, timeframes, innovation, team capacity and track record relevant to opportunity	50
TOTAL	100
