4 STEPS OF ASTHMA FIRST AID

1. Sit the person upright

2. Give 4 separate puffs of blue/grey reliever puffer
   - Shake puffer
   - Put 1 puff into spacer
   - Take 4 breaths from spacer
   Repeat until 4 puffs have been taken
   Remember: shake, 1 puff, 4 breaths
   OR give 2 separate doses of a Bricanyl inhaler (age 6 & over)
   or a Symbicort inhaler (over 12)

3. Wait 4 minutes
   If there is no improvement, give 4 more separate puffs of blue/grey reliever as above
   OR give 1 more dose of Bricanyl or Symbicort inhaler

4. If there is still no improvement dial Triple Zero (000) for an ambulance
   Keep giving 4 separate puffs every 4 minutes until emergency assistance arrives
   OR 1 dose of Bricanyl or Symbicort every 4 minutes – up to 3 more doses of Symbicort

Call emergency assistance immediately. Dial Triple Zero (000):
- If the person is not breathing.
- If the person’s asthma suddenly becomes worse, or is not improving.
- If the person is having an asthma attack and a reliever is not available.
- If you are not sure if it’s asthma.
- If the person is known to have an anaphylaxis – follow their Anaphylaxis Action Plan, then give Asthma First Aid. Blue/grey reliever medication is unlikely to harm, even if the person does not have asthma.

Protect yourself this pollen season.
Managing asthma and allergies matters.
